### Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

### Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Executive Order N-33-20**

On 03/19/20, the California State Public Health Officer and Director of the California Department of Public Health ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain Continuity of Operations of the Federal critical infrastructure sectors.

- **Global Health Advisory**

On 03/19/20, the U.S. Department of State issued a Global Health Advisory at Level 4 (Do Not Travel) due to the global impact of COVID-19.

- **FEMA-4482-DR-CA**

On 03/22/20, President Trump approved Major Declarations FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

### **Confirmed Global COVID-19 Cases – Per Worldometers COVID-19 Live Updates as of 10/03/20 at 1000 hours:**

- 34,958,687 (+331,546) total confirmed cases in 213 countries
- 1,035,002 (+5,187) total deaths

### **Confirmed United States COVID-19 Case – Per Centers for Disease Control and Prevention (CDC) as of 10/03/20 at 1100 hours:**

- 7,310,625 (+50,160) total confirmed cases
- 208,118 (+816) total deaths

### **Confirmed California COVID-19 Cases - Per Medical Health Coordination Center as of 10/03/20 at 1100 hours:**

- 819,436 (+2,159) total confirmed cases

- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details.

## Earthquake Swarm, Westmoreland, Imperial County

On Wednesday, 09/30/20, a series of earthquakes began at approximately 1500 hours near the city of Westmoreland located south of the Salton Sea, Imperial County.

- Per the USGS, the swarm continues to show a small amount of activity today. There was only one magnitude 3 or larger earthquake recorded yesterday 10/02/2020, compared to 13 magnitude 3 earthquakes on 10/01/2020 and 48 magnitude 3 and larger earthquakes on the evening of 09/30/2020.
  - USGS will continue to produce forecasts throughout the weekend. Forecasts will be posted by 0830 hours daily.
- As of 10/03/20 at 0800 hours, there have been a total of 356 M2.0 and higher earthquakes with the largest being a M4.9.
  - The earthquake swarm magnitudes breakdown as follows:
    - M4.0 - M4.9: 7
    - M3.0 - M3.9: [69](#)
    - M2.0 - M2.9: [282](#)
- The following three scenarios describe possibilities of what could happen from 10/01/20 to 10/08/20:
  - Scenario One (Most likely: 97%): Earthquakes continue, possibly including earthquakes up to magnitude 5.4. The most likely scenario is that the rate of earthquakes in the swarm will decrease over the next 7 days. Some additional moderately sized earthquakes (M4.5 to 5.4) may occur, which could cause localized damage, particularly in weak structures. Smaller magnitude earthquakes (M3.0+) may be felt by people close to the epicenters.
  - Scenario Two (Less likely: 3%): A larger earthquake (magnitude 5.5 to 6.9) could occur within the next 7 days. A less likely scenario is a somewhat larger earthquake could occur (up to a M6.9). Earthquakes of this size could cause damage around the area close to the earthquakes that have already occurred and would be followed by aftershocks that would increase the number of smaller earthquakes per day. This scenario occurred in a previous swarm in the area – in 1981, when a swarm in this region included a magnitude 5.8 earthquake.
  - Scenario Three (Least Likely: approximately 1 in 1000): A much larger earthquake (magnitude 7 or higher) could occur within the next 7 days. A much less likely scenario, compared with the previous two scenarios, is that the ongoing swarm could trigger an earthquake significantly larger than the M4.9 that occurred on the 30 September (i.e., M7.0 and above).
- [The EQTP Duty Officer will continue to monitor and provide updates as warranted.](#)
